

# Create Repository for Your Group Project

## Step1. New Repository

1. In your browser, open the link <https://github.com/workshopIII>.

2. Click the green button **New**.
3. Fill into your group project information.

## Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

### Repository template

Start your repository with a template repository's contents.

### Owner

### Repository name \*

Great repository names are short and memorable. Need inspiration? How about **cuddly-winner**?

### Description (optional)

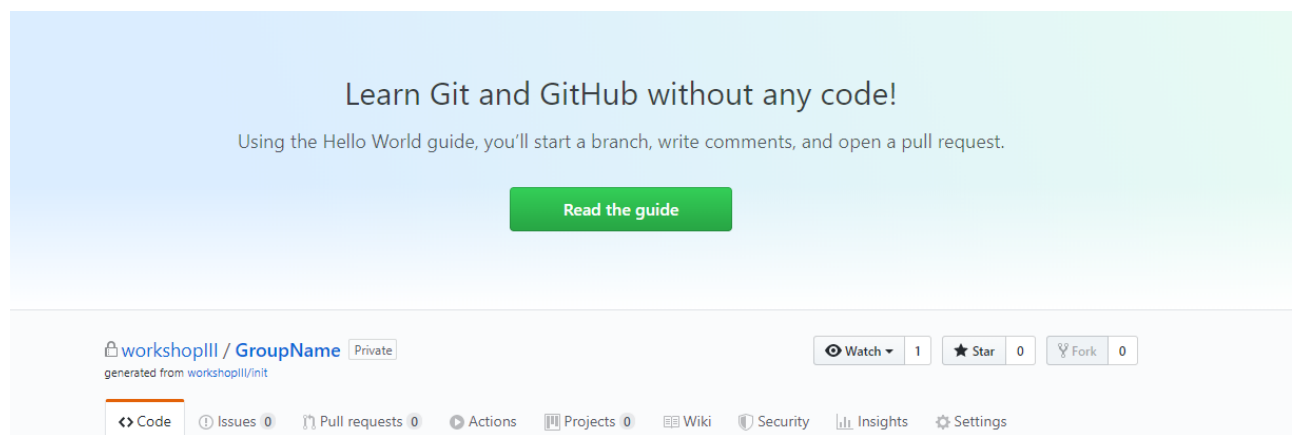

- ☐ **Public**  
Anyone can see this repository. You choose who can commit.
- ☒ **Private**  
You choose who can see and commit to this repository.

Create repository

- Repository template: workshopIII/init
- Repository name: Your group name.
- Description: Something information about your project.
- Public / Private: Private.

#### 4. Click Create repository.

## Generating your repository...

It should only take a few seconds.

Refresh

## Learn Git and GitHub without any code!

Using the Hello World guide, you'll start a branch, write comments, and open a pull request.

### Collaborators

Push access to the repository

This repository doesn't have any collaborators yet. Use the form below to add a collaborator.

**Search by username, full name or email address**  
You'll only be able to find a GitHub user by their email address if they've chosen to list it publicly. Otherwise, use their username instead.

Add collaborator

0 of 3 collaborators

2. Add a new collaborator into your repository.
